## FIRE

Accidents happen. Our certified experts at **CLEAN JOE** pride themselves in providing excellent service to all our clients. They have the expertise to quickly assess your situation and provide a solution to restore your home or office.

Emergency services are available 24 hours a day, 7 days a week. Upon arrival to your property, we will work to prevent the situation from worsening and begin the restoration process. We strive to save and restore your valuable and irreplaceable memories.

### Smoke & Soot Restoration Services Include:

- Removal & Remediation
- Contents Cleaning
- Contents Pack-Out
- Wall & Ceiling Cleaning
- Cleaning & Sanitation
- Professional Deodorization & Restoration

Please note, the longer smoke is in your home, the risk of further damage increases.

Visit [CLEANJOE.com](http://CLEANJOE.com) for helpful tips on minimizing any further damage.

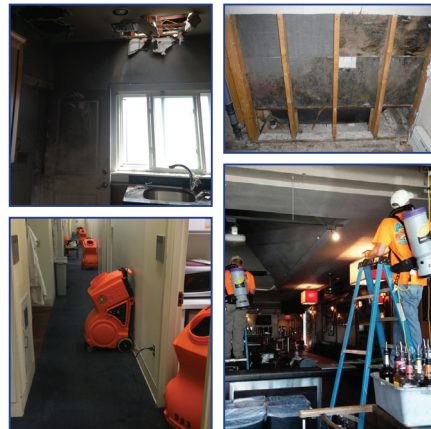

## WATER

Water damage is a progressive problem. If not promptly addressed, it can continue to cause more damage to your family, children, and property. CLEAN JOE responds to water emergencies 24 hours a day, 7 days a week.

### CLEAN JOE Provides:

- Assessment of Water Damage
- Water Extraction
- Drying & Dehumidification
- Water & Flood Restoration
- Sewage Cleanup & Removal
- Insurance Claims Assistance

## MOLD

Many mold problems are not visually detectable and will require professional testing to locate them. To correct any mold issues, CLEAN JOE can provide a thorough mold assessment and remove mold.

Unfortunately, mold can trigger an allergic reaction and asthma in certain individuals. An allergic reaction to mold can include hay fever symptoms, and for those with asthma, mold spores can trigger asthma attacks. It is crucial to discover and remove mold for health and safety reasons.

### Our Mold Discovery Process:

- **Visual Observations** – Inspection to detect if mold is present and document extent of the mold growth.
- **Third-party Testing** – Air, surface and bulk sampling to identify what types of mold are present.
- **Odor Assessment** – Odor detection using instrumentation.
- **Airborne Particles** – Measurement of concentrations of particles and mold spores in the air using the latest particle counter instruments.
- **Moisture Readings**
- **Laboratory Testing** – Samples will be sent to an independent laboratory accredited by the AIHA (American Industrial Hygiene Association)

## COMMERCIAL INDUSTRIES & PROPERTIES WE SERVICE:

Condominiums/Apartments, Multifamily, Office Buildings, Warehouses, Manufacturing & Industrial Facilities, Hospitality, Mixed-use properties, Shopping Centers, Retail Stores, Healthcare, Senior living, Hospitals & Laboratories, Schools & Universities

Clean Joe's emergency disaster team is available 24/7 to help restore your commercial and residential properties back to their pre-loss condition. Our goal is to respond and react as quickly as possible while delivering the highest quality service and communication throughout the whole process.
